

The pet of the month is...

Patron

Andrew and Kelly Horwick brought Patron, a yellow Labrador Retriever, into their family ten months ago as a two month old puppy. They got Patron from a local breeder. Patron loves to sleep on either her bed, Andrew and Kelly's bed, or the children's beds. She also likes to lie in the bay window and watch what is going on in the outside world.

Patron's favorite treats are Pupperonis and bones, which also happens to be her favorite toy. She loves to go swimming at the beach. Fortunately the family lives close to the lake so she gets to go often. She also is fond of playing tug-o-war with the other dog that she lives with, Cuervo, whom Patron gets along with great.

When Patron was a puppy she decided that the family needed a new couch and made sure that they got one by chewing up their old couch.

We are looking forward to seeing Patron for many more years to come.
