

Skyline

Skyline is a 5 month old kitten that lives with Kelly Kleiber. Skyline was found in the Plymouth Walmart parking lot by Kelly's son at midnight in July. It took them an hour to catch her and when they finally were able to catch her she was under a Nissan Skyline. The first night she slept in the Kleiber's camper with the three boys that found her because they were unsure who she was going to stay with. Kelly decided that she could stay with them and she integrated into the family easily. She was just over 1 pound when she was 3 to 4 months but is now at an ideal weight for her age.

Skyline enjoys sleeping on the computer chair or in the window sill. She loves to play with her ball with a bell in it and eating Beach Flavored Party Treats. She lives with a dog named Buck and they get along well. They like to sleep next to each other. Skyline will also hide under the couch and jump out at the dog. She also likes to play with fly swatters and Kelly's granddaughter. Kelly's granddaughter can be seen carrying the cat around in the laundry basket. The doctors and staff look forward to seeing Skyline and her family for many more years to come.
